Program of Studies-NEW

# Importance of Grade 11 and 12

---

- Grade 11 is the last year to impact your GPA.
- FINISH STRONG!
- Senior year goals:
  - 90 credits to be a Senior
  - Challenge yourself (Rigor of academics)
  - Don't overload
  - Graduation requirements versus college admissions
- Consider when to take standardized tests and how to boost your resume

# SAT VS. ACT

---

- It is your responsibility to register for the exams online and register by their deadlines.
  - [www.collegeboard.org](http://www.collegeboard.org)
  - [www.actstudent.org](http://www.actstudent.org)
- Practice exams for both tests are located online to help you determine which test is right for you.
- As a reminder, there are many colleges that do not require standardized testing. More information can be found at [www.fairtest.org](http://www.fairtest.org)

# Failure Rule Reminders

# Program of Studies: Mathematics

---

## High School Website

### Mathematics

The high school mathematics curriculum is designed to meet the individual differences in ability, interests, and future educational/life goals. Students are required to take 15 credits of high school mathematics, including Algebra I and Geometry, or the content equivalent, and a third year of math that builds on the concepts and skills of algebra and geometry and prepares students for college and 21st century careers. Courses in statistics, engineering, and computer science are also available through the mathematics course offerings. BRHS offers mathematics courses at the academic, honors and advanced placement levels. It is the belief that all students should be offered the opportunity to take rigorous mathematics courses if desired. As such, there are no specific grades needed as prerequisites for honors and advanced placement mathematics courses. Decisions on levels should be made in conjunction with the school counselor and be based on student desire to challenge themselves in mathematical reasoning, modeling and application.

# Mathematics Courses

---

**Algebra III / Trigonometry (A) .....Credits: 5**

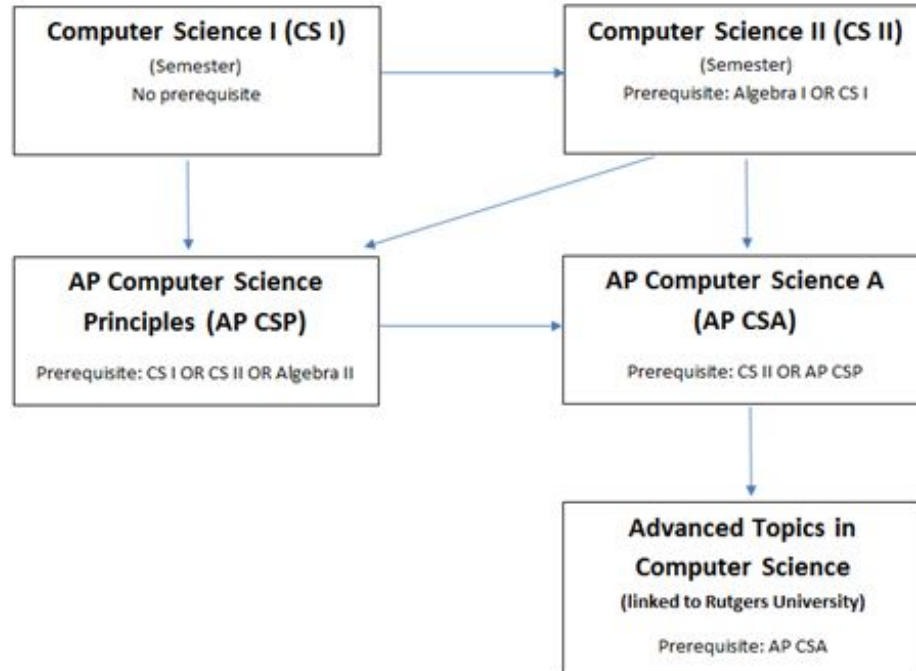

Prerequisite – Algebra II OR Essentials of Algebra II

Algebra III/Trigonometry is designed to strengthen and extend students' algebraic concepts and skills in preparation for precalculus/calculus. The course introduces the study of trigonometric functions, identities, equations and their applications.

\*This replaces Math Analysis

# Computer Science Changes

## BRHS Computer Science Course Progression

# Scheduling Reminder

---

Please note: **Students are not able to make changes to their scheduling requests after March 27, 2020.**

Please make sure to select the academic courses, elective courses and at least two alternate courses that you want.
